Wooden pressed / Cold pressed Oils

What are Refined oils:

Edible Oil meant for human consumption is refined using **harmful chemicals** such as "Gasoline and Hexan". To make it double refined more than **10 chemicals** are used. Further, to mask the odour, the oil is boiled at **350 – 450 F**. "Bleaching" is done to alter the colour of oil. "Digining" is done to decrease the thickness of oil and **chemical preservatives** are added to increase the shelf life. Because of all these processes, required Nutrients, Minerals, Vitamins, Fats are **destroyed** which are very much required to decrease the Cholesterol in body. **Such refined oils lead to high Blood pressure, Thyroid, Heart diseases, Peptic (Stomach & Intestine) ulcers and perhaps Cancer also.**

What are Wooden pressed / Cold pressed oils:

Edible Oil obtained by Wodeen press / Cold press process are pure oils that are non-refined and un-adulterated. These are also called "Wooden churner oils" & "Cold pressed oils". It is extracted at a temperature ranging between 40-45 °C. Because of this all nutritious elements required by human body, remains as such in the extracted oil. This helps oil to maintain natural odour and stickiness. This is the reflection of the purity of the oil. By consuming such oils, good Cholesterol i.e High Density Lipoprotein – HDL increases. This helps to prevent Blood pressure, Thyroid, Heart diseases and Arthritis.

These oils are extracted from oil seeds by Traditional/Ancient technique called "WOODEN PRESS PROCESS". In this technique, the oil seeds are first cleaned by shakers to remove dust and foreign materials. Then cleaned seeds are transferred to extraction assembly with wooden churner made of Mango, Tamarind or Neem tree. Churning crushes the seeds and slowly oil is extracted. This oil is further filtered by using cloth or sieve and filled in containers as per requirements. Containers are further sealed and labeled for marketing. Around 45 – 55 % recovery of oil is made from various seeds. Oil cakes which remains after extraction is nutritious and used as cattle feed.

Our Products: (500 ml, 1 L & 5 L Bottle)

शेंगदाणा तेल
Groundnut Oil

खोबरेल तेल
Coconut Oil

बदाम तेल
Almond Oil

सूर्यफूल तेल
Sunflower Oil

अक्रोड तेल
Walnut Oil

तीळ तेल
Sesame Oil

करडई तेल
Safflower Oil

मोहरी तेल
Mustard Oil

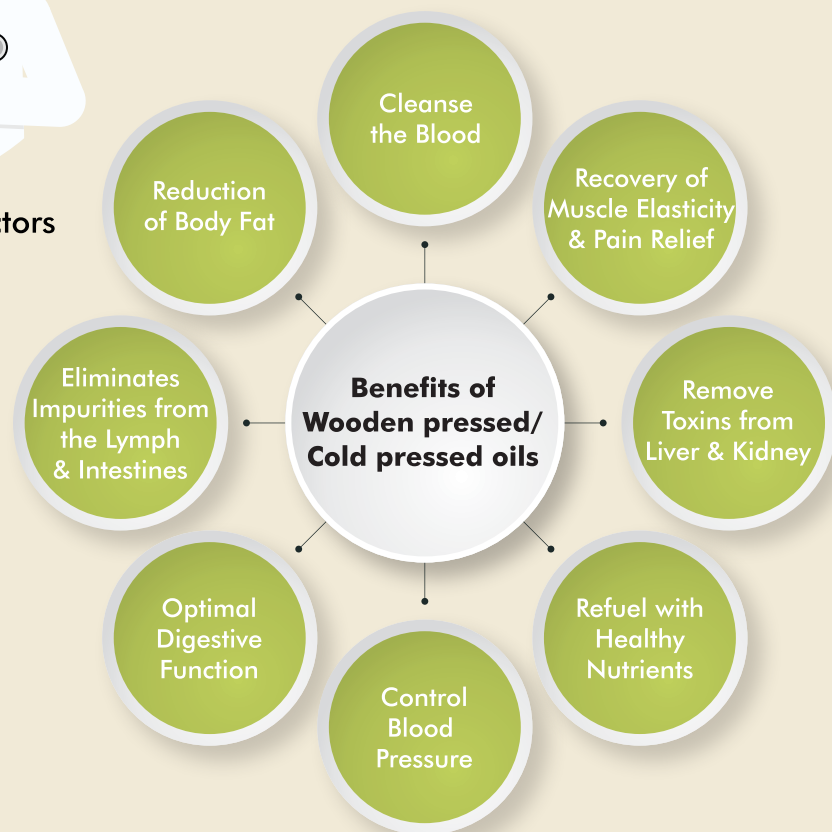

जवस तेल
Flax Oil

Advantages of Wooden pressed / Cold pressed oils:

- Extracted by natural and traditional method.
- 100 % Natural, Pure and Chemical free.
- Rich in Vitamins, Minerals and Nutrients.
- 50 % less consumption than Refined oils.
- Helps to prevent Blood pressure, Thyroid, Heart diseases and Arthritis.
- Helps to control Cholesterol.
- Improves Digestive functions.
- Increases immunity.
- Improves skin texture.

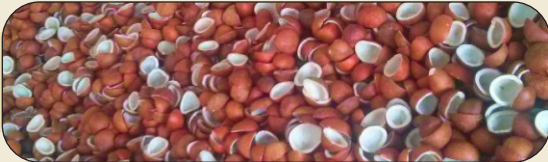

- Recommended by Doctors

Declaration:

1. We hereby guarantee the QUALITY of Wooden pressed / Cold pressed oils as the oils are extracted by trained staff under Good manufacturing practices and hygienic conditions.
2. The percentage of oil content in oil seeds is between 40-50 % which results in high price of product. However, we have tried our best to offer good quality at the best price.

Oil Output

मूंगफली Groundnut		40 - 45 %
नारियल Coconut		45 - 55 %
बादाम Almond		40 - 45 %
सूरजमुखी Sunflower		18 - 25 %
तिल Sesame		42 - 52 %
सरसो Mustard		25 - 35 %
अलसी के बीज Flax Seed		45 - 50 %

NOTE: Oil output depends on quality of seeds.
